EXPERIENCE

Jedis Tecnologia

April 2025 – Present

Junior Full-Stack Developer | Promoted from Intern

Minas Gerais, Brazil

- Participated in the **architectural planning and design** of Rhapido, a **white-label ATS SaaS**, contributing to technical decisions from the project's inception
- Developed and shipped features across the full stack using **Next.js/React** and **Spring Boot (Java)**, delivering production-ready functionality end-to-end
- Collaborated on **infrastructure setup and containerization** with **Docker** and **Kubernetes**, supporting scalable deployments of a multi-tenant SaaS platform
- Currently driving **platform maintenance and continuous feature evolution**, ensuring codebase quality and system stability in production
- *Promoted to Junior Developer in Jan. 2026* after demonstrating consistent technical growth and ownership over deliverables throughout the internship

PROJECTS

Delivery Route Manager | *Next.js, NestJS, PostgreSQL*

- Built a **full-stack delivery route management system** for a furniture company, covering route planning, driver assignment, and delivery tracking
- **Award: Best Academic Project** of the semester recognized by the course faculty among all competing teams

PetTrail | *Next.js, NestJS, Flutter, RabbitMQ* | *In Development*

- Developing an **Uber-like platform for pet outings**, with a mobile app in Flutter for end-users and a web dashboard in Next.js for service management
- Designed a **multi-platform architecture** with a shared NestJS backend, handling real-time matching between pet owners and walkers
- Architected a **message broker-driven microservices layer** with 2 independent services communicating asynchronously with the core backend via **RabbitMQ**
- Implemented a **full CI/CD pipeline** using **GitHub Actions**, automating build, test, and deployment workflows across all services

Spiritist Center Portal | *Next.js, Django, PostgreSQL*

- Developed a **dual-access web platform**: a public-facing portal displaying institutional information and a **private admin panel** for managing events, donations, and internal reports
- Implemented **role-based access control** and a reporting dashboard, streamlining administrative workflows for the organization

EDUCATION

PUC Minas

Aug. 2023 – Dec. 2027

Bachelor of Software Engineering

Belo Horizonte, MG, Brazil

- **Coursework:** Software Architecture, Distributed Systems, Algorithm Analysis, Requirements Engineering, Fundamentals of Software Engineering, Data Structures I & II, Calculus I & II

SKILLS

Languages & Frameworks : TypeScript, Java, Python, Dart | Next.js, React, NestJS, Spring Boot, Django, Flutter

Databases : PostgreSQL, MySQL, Redis, H2 | Supabase, Firebase Realtime Database

Infrastructure & DevOps: Docker, Kubernetes, GitHub Actions, ArgoCD, GCP, Vercel, Railway, Cloudflare R2

Messaging : RabbitMQ, Redis Pub/Sub

Tools : Git, Grafana, Insomnia, Postman, DataGrip, Beekeeper Studio, Jira, PlantUML
